

SHAKE

SteelROCK PACIFIC SHAKE®

Your permanent solution!

Created using the strength of today's high yield Galvalume® steel, the PACIFIC SHAKE® marries with the environment, and enhances any home without the fear of fire or weather concerns normally associated with wood roofs. It's exceptionally lightweight at only 1.5lbs/sq. ft. Combining the Strength of Steel with the durability of rock, SteelROCK roof products offer the best protection for your home.

Whether you need a new roof or a replacement roof, SteelROCK PACIFIC SHAKE'S® specially designed deep wood grain grooves and modular sections within each panel create a rich wood shake profile to blend perfectly with the surrounding architecture.

The PACIFIC SHAKE® design helps protect your home from Fire, High-Winds, Hail & Snow by marrying Steel & Rock into a single shield against time - the permanent solution for your home.

ROOF PRODUCTS

PACIFIC SHAKE®

Strong / Durable / Timeless

Panel Coating Layers

Every SteelROCK panel is formed from 26-gauge Galvalume® steel and covered with natural stone granules that are embedded in a 100% acrylic resin basecoat. The panels are then finished with a clear acrylic over-glaze to seal and protect the stone granules.

SteelROCK panels are not only strong, lightweight and durable but they've also surpassed the industry's highest performance tests to date. All of SteelROCK's *blended colors are enhanced with flashes of rock granules in either a dark or light accent to add a subtle beauty to the roof's overall appearance.

The panels are backed by a lifetime* limited warranty covering 120-mph winds and a Class-4 Hail impact (UL 2218) resistance rating. SteelROCK is proud to offer today's homeowners and builders a product that will provide years of maintenance free protection and beauty.
