

SteelROCK
PACIFIC VILLA TILE®

Your permanent solution!

Combining the strength of today's high yield Galvalume® steel with the most popular tile design on the market, PACIFIC VILLA-TILE® offers the best protection for your home - without sacrificing beauty. At only 1.5 lbs. per square foot, PACIFIC VILLA-TILE® is one of the lightest roofing tiles available, which means you can enjoy the beauty of a tile roof without the worry of excessive weight.

Whether you're in need of a new or replacement roof, PACIFIC VILLA-TILE's® angular design and graceful slopes create a rich and deep profile that is suitable for numerous architectural styles and complies with most homeowner's association guidelines.

Our PACIFIC VILLA-TILE® design helps to protect your home from fire, high winds, hail and snow by coupling steel and rock into a single shield against the elements. PACIFIC VILLA-TILE's® high-tech construction makes it the permanent solution for your home.

SteelROCK®
ROOF PRODUCTS

VILLA TILE®

Strong | Durable | Timeless

Every SteelROCK panel is formed from 26-gauge Galvalume® steel and covered with natural stone granules that are embedded in a 100% acrylic resin basecoat. The panels are then finished with a clear acrylic over-glaze to seal and protect the stone granules.

SteelROCK panels are not only strong, lightweight and durable but they've also surpassed the industry's highest performance tests to date. All of SteelROCK's *blended colors are enhanced with flashes of rock granules in either a dark or light accent to add a subtle beauty to the roof's overall appearance.

The panels are backed by a lifetime* limited warranty covering 120-mph winds and a Class-4 Hail impact (UL 2218) resistance rating. SteelROCK is proud to offer today's homeowners and builders a product that will provide years of maintenance free protection and beauty.
